

SAFEST DAYS OF SUMMER

100SAFESTDAYSOFSUMMER.ORG

This stretch of summer is historically the **most dangerous** time of year for teen drivers, with crash rates spiking significantly.

3x more likely

Teen drivers (ages 16-19) are nearly three times more likely per mile driven to be involved in a fatal crash compared to drivers aged 20 and up.

7,316

lives were lost in teen driver-related crashes during the summer months alone—nearly half of all teen crash fatalities for the entire year from 2012–2021.

Car crashes remain the **leading cause** of unintentional death and serious injury among young people.

BUT IT DOESN'T HAVE TO BE THIS WAY.

Together, we're promoting a culture of **shared responsibility**, safe driving and riding behaviors – empowering youth and their communities to create **lasting change**.

MAKE THE NEXT 100 DAYS THE SAFEST DAYS OF SUMMER!

Visit www.100SafestDaysOfSummer.org for more information!

We've created a calendar packed with weekly themes, toolkits, and shareable resources to equip parents, teens, educators, and advocates with everything they need to make a difference.
